SPLASH|BACK

Environmental Policy

Splashback.co.uk endeavour to minimise waste, re-using and recycling materials and using sustainable material resources where possible and are committed to preventing pollution. Protecting and enhancing the environment by preventing pollution is integral to our business operations and it is our policy to invest and operate in a way to ensure this is not compromised.

Specifically, we will:

- Commit to continually improve our environmental performance
- Implement energy conservation measures where possible
- Implement the efficient use of energy, water and sustainable products and materials in future business operations development
- Always operate in accordance with applicable legal requirements and with other requirements to which splashback.co.uk subscribes
- Promote a positive environmental culture and consultation with employees on changes that may affect environmental impact arising from our operations
- Set & Review targets & objectives for environmental performance
- Encourage through our procurement system our suppliers to use good environmental practice
- Educate and train our employees regarding best practice and our environmental protection systems

This policy will be reviewed annually to ensure it remains relevant & appropriate to splashback.co.uk's operations. It shall also be subject to revision as necessary at other times to account for changes in environmental legislation or changes in business nature and size. Our Environmental Policy is publicly available.
